

# Parallax FREE KIT

## Pixel Life Studio.

Thank you for your purchase, we from Pixel Art Studio hope this asset brings you a good experience.

If you have any difficulties or problems you can contact us [lobodeff@gmail.com](mailto:lobodeff@gmail.com).

The license for this product includes PERSONAL USE and COMERCIAL USE.

You can modify this asset and artwork, redistribute this asset or its content is prohibited.

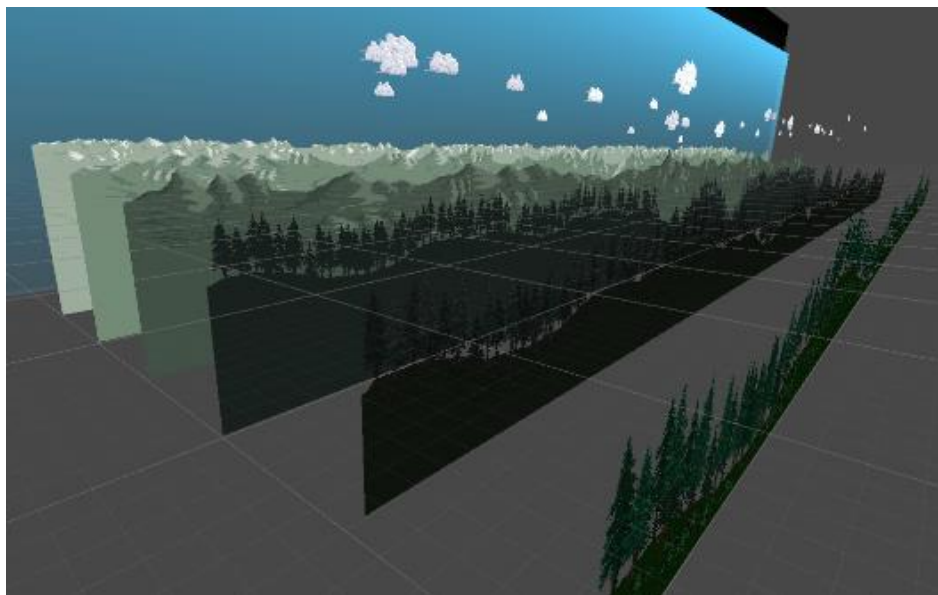

## First steps understanding the asset.

You will find a DEMO scene ready with all the sprites setup in different Z positions to simulate the parallax effect, no code was used.

The sprites resolution is 800x600 (with safe frame).

The pixel count was setup to 64 pixels so the image don't look distorted.

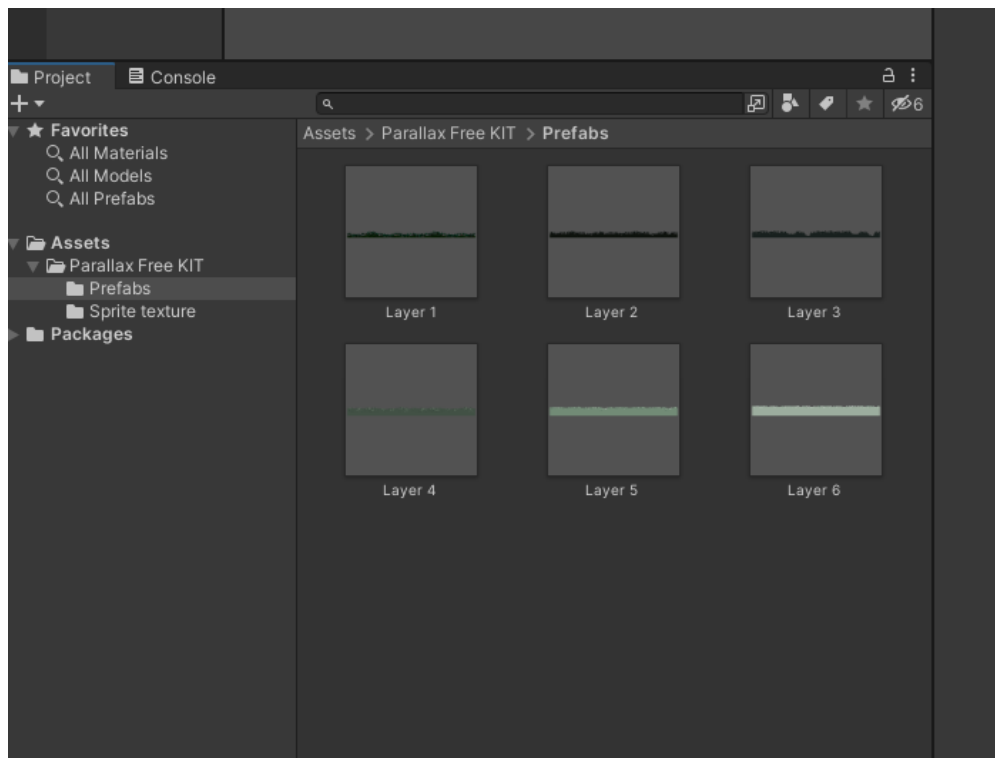

All the images are divided in 6 layers to further improve the Parallax realism.

All the images are interchangeable so Layer1 Sprite1 can connect with any Layer1 image, and so on.

So you can create different combinations to break patterns and increase the realism.

We hope that this asset help you in any way.  
(We will provide a complete Parallax KIT soon with, stay tuned).
